

INFORMAL set of amended claims

CLAIMS:

- 1 1. A system for prescribing medications through the Internet comprising:
 - 2 (a) a secured, interactive website for entering and retrieving medical
 - 3 prescriptions, the website accessible via the internet by a general use
 - 4 computer;
 - 5 (b) the website of step (a) secured by encryption;
 - 6 (c) the secured website of step (a) further secured by limiting access to
 - 7 medical personnel having an authorized I.D. code and pharmaceutical
 - 8 personnel having an authorized I.D.;
 - 9 (d) a one central remote dedicated server connected to the internet with
 - 10 access limited to users having the authorized I.D's of (c), the remote
 - 11 server comprising computer hardware capable of storage of data for the
 - 12 website of step (a), wherein all patient files are stored at one location.
 - 13 (e) a high security internet service provider connected to the remote server
 - 14 for providing access to website by personnel authorized according to (c);
 - 15 (f) means for creating a patient file with patient identifying information, if
 - 16 necessary;
 - 17 (g) means for entering patient prescription into patient file;
 - 18 (h) means for retrieving patient prescription information from patient file;
 - 19 (i) means for entering data regarding filling of prescription in patient file;
 - 20 (j) means for logging off patient file screen so as to secure patient
 - 21 information.
- 1 2. The system of claim 1 wherein the website provided in step (a) further
- 2 comprises internet links to one or more drug information databases
- 3 comprising drug history, adverse reactions to drugs, interactions between
- 4 two or more prescribed medications.
- 1 3. The system of claim 1 wherein the website further comprises a database
- 2 of patient medication history.

- 1 4. The system of claim 1 wherein the remote dedicated server and the
2 Internet system provider are the different computer hardware systems.
- 3 5. The system of claim 1 wherein the means for creating a patient file
4 comprises a screen for entering identifying information selected from a
5 group comprising: patient name, patient social security number, patient
6 driver's license, patient I.D. code or a combination thereof.
- 7 6. The system of claim 1, wherein the authorized I.D. is selected from a
8 group comprising: driver's license number, social security number, a
9 personal code or identification number.
- 10 7. The system of claim 1 wherein the authorized I.D. is selected from a
11 group comprising eye scan, thumb scan, hand scan or finger print scan.
- 12 8. The system of claim 1 wherein the website in (a) further comprises
13 Internet links to health insurance providers.
- 14 9. A process for prescribing medications through the internet comprising:
15 (a) providing a secured, ~~interactive~~ website for entering and retrieving medical
16 prescriptions for all subscribers, the website accessed by a general use
17 computer connected to the Internet;
18 (b) securing the website of step (a) by encryption;
19 (c) further securing the website of step (a) by limiting access to medical
20 personnel having an authorized I.D. and pharmaceutical personnel having
21 authorized I.D.;
22 (d) storing data for the website of step (a) on a one central remote dedicated
23 server computer system connected to the Internet, the central remote
24 dedicated server being limited to access by users having the authorized
25 I.D. of step (c);
26 (e) connecting a high security Internet service provider comprising a computer
27 hardware system to the remote dedicated server of step (d) to provide access
28 to website for personnel authorized according to step (c);
29 (f) accessing a patient file, if available;
30 (g) creating a patient file, if not available according to step (f), the patient file
31 comprising patient identifying information, the identifying information

selected from a group comprising: patient name, patient social security number, patient driver's license, patient I.D. code or a combination thereof;

- (h) entering a prescription into patient file;
- (i) retrieval prescription entered into patient file by pharmacy personnel;
- (j) entering data regarding filling of prescription in patient file;
- (k) logging off patient file screen to secure patient information.

10. A system for storing medical patient records on a secured website comprising:

- (a) a secured, interactive website for entering and retrieving a patient's medical data, the website accessible via the Internet by a general use computer;
- (b) the website of (a) secured by encryption;
- (c) the secured website of (a) further secured by limiting access to medical personnel having an authorized I.D. code;
- (d) a central remote dedicated server connected to the Internet with access limited to users having the authorized codes of (c), the remote server comprising computer hardware capable of storage of data for the website of (a);
- (e) a high security Internet service provider connected to the remote server for providing access to website by personnel authorized according to (c);
- (f) means for creating a patient file with patient identifying information;
- (g) means for entering patient prescription into patient file created in (f);
- (h) means for entering data regarding changes to patient file;
- (k) means for logging off patient file screen so as to secure patient information.

11. The system of claim 10 wherein the website provided in (a) further comprises Internet links to one or more medical information databases comprising current therapy and medical treatment for medical diseases and disorders.

1 12. The system of claim 10 wherein the website provided in (a) further
2 comprises Internet links to one or more drug information databases
3 comprising drug history, adverse reactions to drugs, interactions between
4 two or more prescribed medications.
